50X1-HUM

-2-

6. Most of the plant's mechanical equipment is of Czech and German make; installations include five primitive Bulgarian-made conveyor belts, each 25 meters long, one of which is in use in the military boots' department.
7. The plant's output totals 1,800 pairs of shoes per eight-hour shift; of these, the military department produces 600-650 pairs. The latter department works in one shift only, while most of the other sections of the enterprise operate in two shifts. (The figures constitute the full production potential of the plant.)
